PRODUCT PORTFOLIO 2026

Ophthalmology & ENT Endoscopy

Intraocular lenses · Viscoelastics
Injectors · Surgical instruments
Endoscopy systems

CRISTALENS / VisOcu™ / ODC INDUSTRIES
SURGISTAR / OPTOHELLAS / XION

01 / CRISTALENS

Intraocular lenses

Monofocal, toric and bifocal range

Product	Optical profile and material	Format
CLARE	Monofocal · hydrophilic · clear	Without injector
CLARE + injector	Monofocal · hydrophilic · clear	Lens + injector
ARTIS PL E	Monofocal · hydrophobic · clear	Preloaded
ARTIS T PL E	Toric monofocal · hydrophobic · clear	Preloaded On request
ARTIS PL M	Bifocal · hydrophobic · clear Additions: +2.5 D and +3.0 D	Preloaded On request

ARTIS PL M · Two additions

The +2.5 D and +3.0 D addition models support a mix-and-match strategy, subject to the surgeon’s selection.

Preloaded = lens preloaded in the injection system.

Models and configurations on this page are based on the ORMAMED portfolio.

01 / CRISTALENS

SYMBIOSE & PRIME

Premium portfolio models

Product	Variant	Supply
ARTIS SYMBIOSE	Mid / Plus	On request
ARTIS SYMBIOSE TORIC	Cylinders: 0.75 / 1.50 / 2.25 D	On request
ARTIS SYMBIOSE TORIC	Cylinders: 3.00 / 3.75 D	On request
ARTIS PRIME	Monofocal+ · non-toric	On request
ARTIS PRIME TORIC	Monofocal+ · toric	On request

ARTIS PRIME · Enhanced monofocal

Cristalens presents ARTIS PRIME as an enhanced monofocal lens. The range includes toric and non-toric models with a preloaded system.

Lens selection

Spherical power, cylinder and model are selected according to biometry, clinical assessment and the surgeon’s requirements.

SYMBIOSE variants reflect the ORMAMED list. Technical references: page 10.

02 / VISOCU™

Intraocular viscoelastics

Intraocular Gel Injection · Portfolio concentrations and volumes

Product	Concentration	Volume
VisOcu™ 1.0%	1.0%	1 mL
VisOcu™ 1.4%	1.4%	1 mL
VisOcu™ 1.6%	1.6%	1 mL
VisOcu™ 1.8%	1.8%	1 mL
VisOcu™ 2.2%	2.2%	1 mL
VisOcu™ 3.0%	3.0%	1 mL
VisOcu™ HPMC 2.0%	2.0%	2 mL
VisOcu™ HPMC 2.4%	2.4%	2 mL

VisOcu™ range

Eight variants by concentration and volume. Product selection depends on the procedure and the applicable instructions for use.

Names, concentrations and volumes follow the ORMAMED list.

03 / ODC INDUSTRIES

IOL injectors

Injection systems and cartridges for intraocular lenses

ErgoTouch FLY

Injector for mono-manual or bimanual technique, with butterfly cartridge and transparent body. Cartridge sizes from 1.8 to 2.6 mm.

Model / component	Description
ErgoTouch FLY	Butterfly cartridge; soft-touch grip.
ErgoTouch GLIDE	Back loading (flat-back); 2.2 and 2.4 mm cartridges.
ECO FLY	Slim body for intraocular lens injection.
ODC cartridges	Butterfly, A50 Butterfly and Flat-Back Loading.

The final incision size depends on the model and technique. Lens, cartridge and viscoelastic compatibility is confirmed according to the IFU.

04 / SURGISTAR

Ophthalmic instruments

Product families for eye surgery

Single-use instruments

Knives, blades, cannulas and accessories for cataract, corneal, refractive, vitreoretinal and oculoplastic procedures.

Category	Range
Knives and blades	Stab / paracentesis; crescent; single- and double-bevel phaco slit; MVR / sideport; scleral; lamellar; microkeratome.
Safety Knives	Safety knives: stab, crescent, sideport and phaco slit.
Corneal products	Recipient trephines; donor punches; long trephines; DALK cannulas; corneal blocks.
Vitreoretinal	Backflush accessories and infusion cannulas.
Oculoplastic	Intubation sets and cannulas.

The full Surgistar 2024 catalogue, with REF codes and sizes, is linked on page 10.

04 / SURGISTAR

Cannulas & other ranges

Ophthalmic accessories, ENT, dental and surgical instruments

Family	Contents
Ophthalmic cannulas	Anterior chamber; hydrodissection; anaesthesia; irrigation / aspiration.
Ophthalmic accessories	Bimanual and coaxial I/A handpieces; eye shields; eye sponges; single-use instruments.
ENT	Single-use cutting instruments for ENT.
Dental	Miniature and micro-miniature blades; mirrors; handles and blade holders.
Surgical	Ranges for dermatology, plastic / reconstructive surgery, cardiovascular surgery, orthopaedics and other specialties.

Ordering by REF code

For exact product identification, use the manufacturer’s code, size and configuration. Availability of each reference is confirmed on request.

Sources: Surgistar 2024 catalogue and official Surgistar product categories.

05 / OPTOHELLAS · AVEDRO / GLAUKOS

VibeX Rapid™ riboflavin

For corneal cross-linking · Supplied through Optohellas

VibeX Rapid™

ORMAMED distributes VibeX Rapid™, a riboflavin solution for epithelium-off corneal cross-linking. The product is part of the Avedro / Glaukos range and is supplied through Optohellas.

Product	Category	Supplier
VibeX Rapid™	Riboflavin for corneal cross-linking	Optohellas

Glaukos · Official product information

Optohellas · Avedro range

Photo: Glaukos. Use according to the manufacturer’s instructions. Availability is confirmed on request.

06 / XION

ENT endoscopy

Spectar platform · Modular systems for examination and surgery

EndoSURGERY Spectar

The surgical configuration combines the MATRIX P Spectar camera processor with the MATRIX LED duo light source. The platform supports camera heads and videoendoscopes according to the selected configuration.

Components

- Spectar camera processor
- HD or 4K/UHD camera head
- Light source and optical cable
- Medical monitor
- Flexible videoendoscope, according to application
- Trolley or support system
- DiVAS for documentation, optional

Solution	Application
EndoSURGERY Spectar	Endoscopic surgery
EndoFLEX Spectar	Flexible endoscopy examinations
EndoSTROBE Spectar	Laryngostroboscopy and phoniatrics
EndoOFFICE Spectar	Office endoscopy

4K/UHD and 3D require a suitable P/PL processor and components. A 4K monitor does not turn an HD camera into 4K.
